danbudworthmead@gmail.com · 07766918401

<http://danbudworthmead.com>

Hardworking games programmer and software engineer. Notable works can be seen on my website listed above.

EXPERIENCE

MAY 2022 – PRESENT

QA AUTOMATION ENGINEER, LOCKWOOD PUBLISHING

In charge of maintaining and updating QA automation scripts. Along with building visualization dashboards for results of tests. Working in C# on the client, python for the testing, and ReactJS for the dashboards.

APRIL 2020 – APRIL 2022

CORETECH ENGINEER, LOCKWOOD PUBLISHING

Work on underlying core technologies such as asset content delivery and QA automation systems. Using Unity to develop a leading social platform mobile game. Using C# and perforce for version control. Maintained and refactored old code bases and upgraded outdated libraries.

JULY 2017 – APRIL 2020

GAMES PROGRAMMER, SUMO DIGITAL

Worked on Team Sonic Racing for a year and a quarter. This was an eighty-person project. Primarily worked on the Team Adventure Mode for the game but also on many low-level optimizations, prototyping of mechanics, the progression system, and audio code.

Also worked on an AAA online multiplayer realistic racing game. Worked primarily on UI code and core gameplay features.

Used C++ with two different in-house engines during my time at Sumo Digital.

EDUCATION

SEPTEMBER 2015 – JULY 2019

GAMES PROGRAMMING, UNIVERSITY OF GLOUCESTERSHIRE

1:1 in Games Programming BSc at the University of Gloucestershire. My notable works can be seen at <http://danbudworthmead.com>. Official feedback documents of University work available upon request.
